

Train the Trainer: National/ International Training & Assessment Development Programme

Face to face delivery

- > Specific, Tailored Train the Trainer Packages
- > Includes Train the Trainer and Exemplar Industry Skills Training

- 2 to 4 week packages available
- Skill specific if required
- One to one instructional techniques
- Tailored solutions
- Developed and delivered by Safety Works experienced training experts
- Assessor & Internal Verifier packages available

COURSE SUMMARY

Safety Works technical training experts will work alongside your appointed instructors and deliver the course/ package, demonstrating how to instruct the subject matter, enhance the training and assessment skills of instructors to meet the requirements of international accreditations.

Support, guidance and feedback is provided to instructors to enable awareness of internationally accepted instructional and training techniques, including hands on, face to face instruction and dialogue.

This course is aimed at technical personnel with occupational experience that need to deliver on and off the job training on site in the working environment or in a designated training centre. The course focuses on the basic learning process, communicating and coaching skills, preparation of training plans, delivering presentations/ practical demonstrations and learner feedback skills. In addition our skilled training practitioners will deliver exemplar training and instruction to your trainees from which your trainers can then learn and apply the skills attained within their workshops following on from our intensive "Train the Trainer" sessions.

KEY BENEFITS

- Understand the role of a trainer and learning process
- To prepare the learner for the learning process
- Enhance training techniques
- Deliver training sessions
- Increase confidence in delivering presentations and practical demonstrations
- Enhance training and coaching skills

WHICH JOB SKILLS DO WE COVER:

- Industrial Drone Operations
- Security Risk Management
- Flange Management & MJJ
- Electrical Installation
- Electrical Maintenance
- Instrumentation & Controls Maintenance
- Instrument Pipefitting (Small Bore Tubing)
- Mechanical Fitting
- Mechanical Maintenance
- Non-Destructive Testing (NDT)

- Pipefitting
- Plating
- Rigging
- Scaffolder (Basic)
- Scaffold Inspector (Advanced)
- Scaffolder (Inspector)
- Steel Erecting
- Thermal Insulator
- Welding Preparation (Pipe)
- Welding Preparation (Plate)
- Crane Operations
- Banksman & Slinger
- Health & Safety Trainer – Multi Discipline, materials can be supplied:
 - Authorised Gas Tester
 - Task Risk Assessment
 - Lock Out & Tag Out
 - Confined Space Entry
 - Hot Work Supervisor
 - Safety Watch
 - Behaviour Based Safety Training
 - Hydrogen Sulphide (H2S)
 - Ionising Radiation (NORM)
 - Bypass Overrides
 - Others as required
- Assessor Training & Assessment
- Internal Verifier Training & Assessment

REVALIDATION:
There is no revalidation requirement for this course
